Profile

Recruiter with agency and in-house experience across games, creative, tech and many other industries. I listen first, ask the questions that matter, and connect people with teams where they truly fit — moving fast, and treating every candidate as a person, not a pipeline. I'm a gamer myself, and rhythm games are my favourite.

> *"This girl talks a lot — I don't know yet if she can deliver, but she is seriously persuasive."*
>
> — My GM at my interview. Six months later: 65+ requisitions, 42+ positions filled.

> *"Decisive and steady. She hears everyone out, pulls the ideas together, then decides firmly — and the team follows."*
>
> — University friends, on working with me.
